SUMMARY

Motivated Computer Science graduate pursuing a position in IT support, Help Desk, or Cybersecurity. Eager to put academic training into practice and help protect public sector infrastructure, ensure high system availability, and deliver outstanding technical support. Highly adaptable to diverse technologies, with strong communication and documentation skills, and the ability to bridge the gap between technical and non-technical stakeholders.

EDUCATION

University Of Central Florida

Bachelor of Science in Computer Science

Orlando, FL

Aug. 2022 – May 2026

Relevant Cybersecurity & Computer Science Coursework

University Of Central Florida

- Security in Computing, and Secure Operating Systems and Administration
- Digital Forensics, and Malware Analysis
- Cryptography and Information Security
- Operating Systems, and System Software
- Design and Implementation of Computer Communication Networks

University Of Central Florida

Master of Science in Cyber Security and Privacy

Orlando, FL

Enrolled for Jan. 2027 – Expected Dec 2028

CERTIFICATION

CompTIA Security+ Certification | 2026

PROJECTS & ACTIVITIES

CTF Competitions | *FTK Imager, Binary Ninja, Burp Suite, John the Ripper, Sleuthkit, Autopsy*

- Competed in Cybersecurity competitions such as OCPS Cyber, Seasonal TryHackMe CTF, PicoCTF, and Spring National Cyber League (NCL).
- Conducted digital forensics using Autopsy and Sleuthkit, including timeline analysis and file recovery.
- Utilized tools such as John the Ripper and Binary Ninja for password cracking and reverse engineering.

Malware analysis lab | *VirtualBox, Windows ISO*

- Built an isolated malware analysis sandbox environment.
- Conducted static and dynamic malware analysis using OllyDbg and Process Monitor.
- Monitored system behavior, processes, and logs to identify malicious activity, and practiced threat detection.

SIEM | *VirtualBox, Ubuntu Linux, Windows, macOS, CVEs, MITRE ATT&CK*

- Built a home Security Information and Event Management (SIEM) system using Wazuh.
- Configured agents to collect and analyze system logs and security events from multiple endpoints.
- Documented system configuration and security monitoring procedures.

Senior Design (2026 Finalists) | *Ubuntu, MariaDB, React, Mapwarper, NetworkX, Leaflet, Figma, Git*

- Collaborated with sponsors and enhanced existing visualization tools and user experience of a web portal featuring historic figures, relationships, and letter traversal through networks and world maps.
- The portal database stores over 250 historic documents from researchers.
- Maintained technical documentation and tracked deliverables.

Rhythm of the Skies | *MERN stack, AWS, PostMan, Git*

- Worked with a group to create an app that generates a music playlist for Spotify based on the weather.
- Created and optimized the search/filter system for 126 music genres.
- Assisted with Server response errors.

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, PHP, SQL (Postgres), JavaScript, HTML/CSS, R

Cybersecurity and IT: Malware Analysis, Cloud Networking and Security, Security Monitoring, Log Analysis, Digital Forensics, Ethical Hacking, Network Configuration & Troubleshooting

Tools & Technologies: Microsoft Office (Word, Excel, PowerPoint, Outlook), Jira, Wireshark, Burp Suite, Metasploit, Linux(Ubuntu, Kali), Autopsy, Sleuthkit, cisco packet Tracer

Soft Skills: Attention to detail, Technical Documentation, Ethical Decision-Making, Research & Analysis, Team Collaboration, Communication, Time Management, Adaptability, Digital Fluency
